TRAINING NEWS UPDATE

Attention all UA 179 Members

Saskatchewan Piping Industry Joint Training Board is pleased to announce access to an on-line learning platform that is now available for members.

Viega is a supplier of various fittings and components used in the piping industry. The link to their web site is: <https://www.viega.com/en/homepage.html>

Through a partnership with UA Canada, members now have access to the Blue Volt On-line Training system. The Blue Volt System has on-line programs related to Hot Water Heating, Trade Math, Loop Cad for in-floor heating design and the list will continue to grow as needs arise.

I have signed up members that have identified they would like a Math Course. This provides the member with on-line math training that they can access anywhere, any time. Apprentices going to trade school that wish to be signed up should email me at: ken.skppin@sasktel.net. I will then sign you up with Viega. This will provide a pretty good math tune-up for our members.

I have also signed up members that identified they wish to take a Hot Water Heating Course. This course has 6 different modules that has theory, component pictures, flow sheets as well as quizzes and tests.

As the administrator of this, I sign up the member and the member will receive an email from Viega with a link to the Blue Volt System. Once the member is at the Blue Volt, the member puts in their user name and sets their own password. I have the list of those that have been signed up and can monitor progress in the background or assist as and when needed.

The Blue Volt On-line Training Platform provides all of us with relevant course content, accessibility to the programs and you can access this training in the comfort of your home at your convenience and schedule.

Take care out there

Ken Busch
